ABSTRACT

The total number of students per professional staff member in the public elementary and secondary school systems of the nation decreased from an estimated 19.8 in 1970-71 to 17.7 in 1972-73, or a decrease of 10.6 percent. The enrollment for the approximately 16,408 operating public school systems in 1972-73 was estimated to be 45,299,766; the total full-time professional staff was 2,556,790 (estimated). In the same year, there were an estimated 17.7 students per professional staff member; 20.1 students per teacher, 428.3 students for every principal and assistant principal, 332.3 students for all other professional employees assigned to individual school buildings, and 702.3 students for all central office administrators and/or supervisors. These data are shown, together with a comparison of information for alternate years (1964-65 through 1972-73). A system-by-system listing of reporting systems with enrollments of 25,000 or more that furnished sufficient information for inclusion is provided; for smaller systems, a selected group of districts is shown for comparison on an enrollment basis. The listing is intended to exemplify systems from various enrollment size groups and from various States. (Author/DN)

Student-Staff Ratios, 1972-73

The total number of students per professional member in the public elementary and secondary school systems of the nation decreased from an estimated 18.8 in 1970-71 to 17.7 in 1972-73, or a decrease of 10.6 percent. This decrease was due to a combination of two factors:

1. The estimated total enrollment of all public school systems in the United States (excluding public community junior colleges) decreased from an estimated total of 45,583,393 in 1970-71 to 45,299,766 in 1972-73, or 0.6 percent.
2. During the same two year period, the total number of professional staff members increased from an estimated 2,302,212 in 1970-71 to 2,556,790 in 1972-73--an increase of 11.1 percent.

These estimates and other information contained in this *Research Memo* were computed from information received by ERS in connection with its "National Survey of Salary Schedules and Fringe Benefits for Administrators and Supervisory Personnel in Public School Systems, 1973-74"--a comprehensive questionnaire concerning salary schedule information, fringe benefit provisions, staffing data, and certain other statistical information. The questionnaire was mailed in the summer of 1973 to a stratified random sample of 1,646 of the approximately 11,693 systems having enrollments of 300 or more pupils. The sample included all systems with enrollments of 12,000 or more and representative samples of smaller systems. Staffing ratio data were requested as of October 1, 1972 (or as near that date as possible) since 1973 data would not then have been available. Staffing data shown for systems with fewer than 300 students in Tables 1-3 are based on updated estimates of previous surveys available.

ENROLLMENT

The total enrollment for the approximately 16,408 operating public school systems in 1972-73 was estimated to be 45,299,766. Approximately 27 percent of the total enrollment was in the 189 systems that had enrollments of 25,000 or more. At the other extreme, 1.2 percent of the total enrollment was in systems enrolling fewer than 300 pupils; however, this group of 4,715 systems accounted for almost 20 percent of the total operating districts.

These enrollment estimates, classified in six groups, are shown in Table 1.

PROFESSIONAL STAFF

BEST COPY AVAILABLE

The total full-time professional staff in all public school systems in the United States in 1972-73 was 2,556,790 (estimated). Of this number, 2,250,150 (88.0 percent) were teachers; 76,917 (3.0 percent) were principals or teaching principals; 28,861 (1.1 percent) were assistant principals; and 136,363 (5.3 percent) were occupying other professional positions assigned to individual school buildings. This latter group includes positions such as counselors, librarians, school nurses, and psychologists.

An estimated 64,499 professional employees (2.5 percent of the total) were employed in central-office positions in 1972-73. Of these, 13,660 were superintendents or other administrative heads of school systems; 1,055 were deputy or associate superintendents; 7,257 were assistant superintendents; and 42,527 were employed in other professional administrative or supervisory capacities (such as administrators for general administration, finance and school plant, pupil and/or staff personnel functions, instructional administration, and special subject-matter areas).

Tables 2A and 2B show detailed classifications of the professional personnel by enrollment groupings.

STAFFING RATIOS, 1972-73

In 1972-73 there were an estimated 17.7 students per professional staff member: 20.1 students per teacher, 428.3 students for every principal and assistant principal, 332.3 students for all other professional employees assigned to individual school buildings, and 702.3 students for central office administrators and/or supervisors. These data are shown in Table 3, together with a comparison of information for alternate years (1964-65 through 1972-73). The data in Table 3 indicate that the ratio of teachers to principals (including assistant principals) has remained almost constant over the past two years--21.7 teachers per principal in 1970-71 and 21.3 teachers per principal in 1972-73. In contrast, the number of other instructional staff members at the building level available to support teachers (counselors, librarians, nurses, etc.) has increased from a ratio of 1 to 18.7 teachers in 1970-71 to 1 to 16.5 teachers in 1972-73.

Table 4 is a system-by-system listing of reporting systems with enrollments of 25,000 or more that furnished sufficient information for inclusion; for smaller systems, a selected group of districts is shown for comparison on an enrollment basis. The listing in Table 4 is not intended as a comprehensive summary of the number and ratios of professional staff members classified by major positions; rather, it is intended to exemplify systems from various enrollment size groups and from various states.

The numbers of staff members for each system shown in Table 4 are presented as they were reported to ERS. The ratios shown were computed from the reported data.

TABLE 1

Estimated Total Enrollment in All Operating Public School Systems, October 1972

Enrollment Grouping	Estimated Enrollment	Estimated Number of Systems	Percent of Total Enrollment	Percent of Total Systems
25,000 or more pupils	12,252,000	189	27.0%	1.2%
12,000 to 24,999 pupils	6,563,472	394	14.5	2.4
6,000 to 11,999 pupils	7,707,307	958	17.0	5.8
3,000 to 5,999 pupils	7,930,036	1,830	17.5	11.2
300 to 2,999 pupils	10,303,354	4,322	22.8	50.7
Less than 300 pupils	543,597	4,715	1.2	28.7

EDUCATIONAL RESEARCH SERVICE, INC., is a nonprofit corporation established and sponsored by the American Association of School Administrators, Council of Chief State School Officers, National Association of Elementary School Principals, National Association of Secondary School Principals, and National School Public Relations Association.

ERS subscriptions are available to local school systems, regional service agencies, state departments of education, state and local associations of school administrators, university departments of school administration, and related organizations interested in school administration and supervision. Subscription rates are available upon request.

In serving the information and research needs of its subscribers, ERS publishes nine series of documents, including the *ERS Research Memo*. A *Research Memo* reports primary data collected by ERS.

This *Research Memo* is restricted by copyright from reproduction in whole or in part without specific written permission. ERS is solely responsible for the contents of its publications; no endorsement by any of ERS' sponsoring organizations is either inferred or implied. Correspondence may be addressed to Glen Robinson, Executive Vice President/Director of Research, or to Dale Gaddy, Assistant Director, EDUCATIONAL RESEARCH SERVICE, INC., 1815 North Fort Myer Drive, Arlington, Virginia 22209 (phone: 703/527-5331).
